

THE IMPACT OF ELECTRIFYING YOUR PUMPING SYSTEM

L'air comprimé est la norme en matière de pompage technologie depuis plus d'un siècle. Mais aujourd'hui les installations – et les installations du futur – ont besoin des moyens plus intelligents, plus propres et plus efficaces pour que les opérations essentielles se déroulent simplement.

Comparaison coûts des technologies

ECONOMIE QUI COMPTENT LE PLUS POUR LES OPERATIONS MODERNES

Alors que la plupart des technologies d'économie d'énergie ont un prix prohibitif, le coût à vie de notre nouvelle pompe électrique est presque le même que celui des pompes pneumatiques à double membrane (AODD) que vous devez remplacer maintenant.

UTILIZE OUR ROI CALCULATOR TO COMPARE YOUR AIR OPERATED DIAPHRAGM PUMP'S COST AND CONSUMPTION TO THE QUANTM PUMP

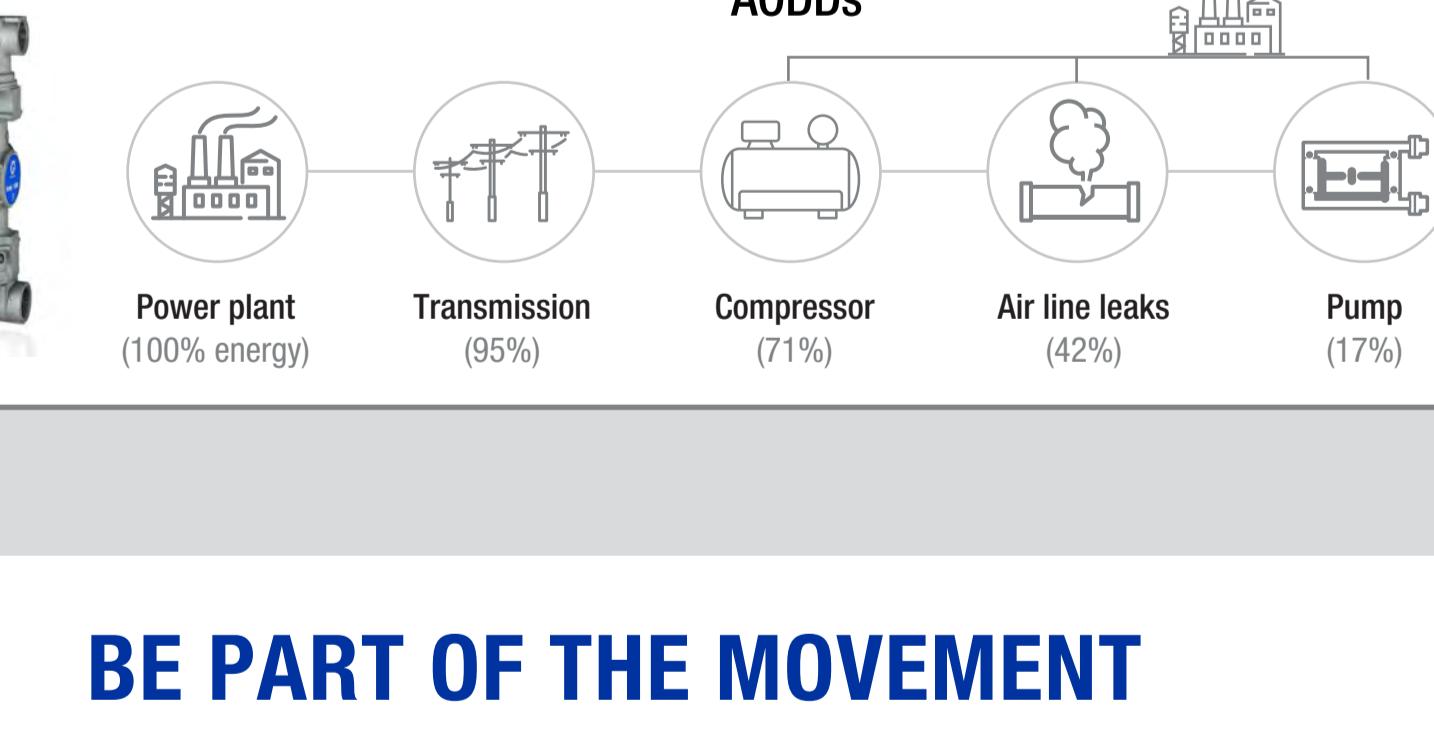

QUANTM FEATURES FluxCore® ELECTRIC MOTOR TECHNOLOGY

LIGHTER, MORE RELIABLE AND UP TO 80% MORE EFFICIENT THAN TRADITIONAL AC GEARED SYSTEMS.

The market has never seen an electric pump like this. FluxCore technology removes the drivetrain that alternating current (AC) motors rely on – instead, it increases torque at lower speeds.

QUANTM ÉCONOMISE L'ÉNERGIE QUE LES POMPES À DIAPHRAGME À COMMANDE D'AIR GASPILLENT

Total energy costs in your plant

AODDs energy costs

Air operated diaphragm pumps (AODDs) are the largest single user of compressed air in your plant.

The purchase price of an air compressor can reach into the hundreds of thousands – and that's before you factor in annual maintenance or the huge amount of energy they consume.

PLUG-AND-PLAY

L'installation d'une nouvelle alimentation électrique est aussi abordable que la modification d'une ligne aérienne existante pour votre pompe à diaphragme à commande d'air. QUANTM est compatible avec les conduites existantes et se branche sur n'importe quelle prise standard. L'installation rapide et facile signifie que vous pouvez commencer à constater l'impact de votre investissement électrique plus rapidement.
